

Operational & Financial **Guidelines**

**State & District
ROP FY 2021-22**

**NVBDCP
National Health Mission**

Assam

Preface note on National Vector Borne Disease Control Programme (NVBDCP), Assam under National Health Mission (NHM), Assam Govt. of Assam.

National Vector Borne Disease Control Program (NVBDCP), Assam under the National Health Mission (NHM), Assam has been achieving towards the target on disease surveillance, control and preventive measures. Mainly six diseases like Malaria, Japanese Encephalitis (JE), Dengue, Chikungunya, Filaria and Kalaazar.

Malaria: Under the national guidance of NVBDCP and supervision of monitoring by state NHM, Malaria situation is tremendously improving. The annual parasite incidence (API) rate of last 7 years is coming down which is shown below:

| | |
|-------------|-------------|
| 2012 – 0.92 | 2016 – 0.24 |
| 2013 – 0.50 | 2017 – 0.15 |
| 2014 – 0.43 | 2019 – 0.11 |
| 2015 – 0.29 | 2020- |

With the support of the GFATM, the intensified Malaria elimination project (IMEP), the following activities are intensified:

1. LLIN in areas ≥ 1 API.
2. Miking and awareness in the high priority S/Cs. 40 S/Cs in every districts.

As per the National Strategy Plan (NSP) 2017 – 2022 on Malaria elimination program, state of Assam has to achieve zero indigenous transmission.

Dengue and Chikungunya: Dengue and Chikungunya have caused serious urban public health importance in Assam. The NVBDCP unit under the state NHM has been addressing very seriously and robust Monitoring and Evaluation (M&E) activities is going on. Blood sample collection and transportation to the testing facilities are available in the state. All medical colleges and all DPHL / SSL are well equipped for testing dengue and Chikungunya. The Cases for Dengue for 2019 is 196 and Death is Nil. Year 2020 total cases 33 and the death are 0.

Japanese Encephalitis (JE): It is a major viral vector borne disease highly endemic in the Upper Assam districts of Assam. In financial year 2019-20, 3 no. of PICU / ICU of 10 bedded is approved in the districts Tinsukia, Dhemaji and Udalguri. So, most of the JE high priority districts there is a PICU / ICU in the state. Testing facilities of JE in free of cost is available in all the medical colleges and DPHL / SSL in all the districts. The epidemiology of last 4 years is shown below:

| Year | Case | Death |
|------|------|-------|
| 2015 | 614 | 135 |
| 2016 | 427 | 92 |
| 2017 | 605 | 87 |
| 2018 | 509 | 94 |
| 2019 | 641 | 161 |
| 2020 | 320 | 51 |

Filaria: Filaria is a parasitic vector borne disease with great public health importance. As per the Accelerated Plan for Elimination of Lymphatic Filaria (APELF), the LF is to be eliminated by 2020.

1. Morbidity management of LF, i.e.

- a) Hydrocoele by operation at DH and Medical College Hospitals.
- B) Management of Lymphedema by antiseptic measure of the lesion with proper line listing.

Robust monitoring and evaluation for communication and social mobilization is going on in all the districts of Assam.

Kalaazar: No case reported since the last 5 years.

Financial Flow for Disease Control Programme: The Financial Flow for Disease Control Programme for NVBDCP for the last years is as follows:

| Year | Total Amount (in Rs. Crores) |
|-----------|------------------------------|
| 2017 – 18 | 15.38 |
| 2018 – 19 | 15.49 |
| 2019 – 20 | 20.33 |
| 2020-21 | 58.08 |

Agenda Intensified under NVBDCP, Assam 2020-21:

- Malaria elimination with zero indigenous positive case by 2022 by improving surveillance and diagnostic facilities.
- IEC/BCC activity in the schools and S/C levels in high priority areas.
- Robust surveillance and monitoring in JE/dengue with improving the diagnostic facilities and Integrated Vector Management (IVM).
- Filaria elimination by 2020 as per the Accelerated Plan for Lymphatic Filaria (APLF) by MDA and MMDP.
- Kalaazar has not been reported since 1st five years but monitoring being done for the stoppage of the reintroduction of disease.

State NVBDCP Unit,
NHM Assam, Govt. of Assam

FMR Code-1.1.5.3
Lymphatic Filariasis: Morbidity Management

- **FMR Owner-State-**
- **Dr.Kumarendra Nath(Asstt Director)**
- **District-DMO/DBVDC**

Budget approved: Rs 9.57 lakhs for 23 districts

Filaria patients need home based morbidity management like washing, prevention and cure Of entry lesions, elevation of the foot, exercise, wearing proper footwear and management of acute attacks. For these activities, one MM Kit Rs.150/- (containing one mug, a soft towel, one soap and anti bacterial ointment) is to be given each Filaria patient. The District Health workers will be involved for these activities.

Hydrocoele operation is also an important activity in Filaria endemic districts where MDA was Completed. **District** should perform Hydrocoele operation in their respective suitable Hospitals @ Rs.750/-per Hydrocelectomy.

| Sl. No. | Activity | Amount in Rs. |
|----------------|------------------------|----------------------|
| 1 | Incentive of Surgeon | 250 |
| 2 | Staff Nurse | 50 |
| 3 | Ward Boy | 50 |
| 4 | Medicines/Dressing | 300 |
| 5 | Patient Transportation | 100 |
| Total | | 750 |

FMR Code-3.1.1.4.1-
ASHA Incentive/ Honorarium for Malaria-:

FMR Owner-State-

- SPO,NVBDCP
- District Owner-DMO/DBVDC

Budget Approved: 160.260 Lakhs for 33 no.s of Districts

Objectives:

Fever is a very common symptom of disease. The community may suffer fever from any disease. Malaria is a surveillance prone disease. ASHAs were trained about the sign & symptom, diagnosis and treatment of malaria.

Drugs like Chloroquine, ACT-AL and diagnosis Kit (RDT, Micro slides) provided to ASHAs from the SC/PHC of the district.

ASHA incentives/honorarium to ASHAs for malaria: Rs 15/- per slides/ RDT and Rs 75/- for the positive cases provided to ASHAs from Block PHC.

A claim form is also provided to ASHAs for claiming the payment which is signed by MPW and ANM.

The programme was implemented from 2010-11 and desired result was achieved

District wise break up as per ASHA's prepared.

FMR Code-3.1.1.4.2-
ASHA Incentive for Dengue and Chikungunya-:

FMR Owner-State-

- SPO,NVBDCP
- District Owner-DMO/DBVDC

Budget Approved: 7.550 Lakhs for 33 no.s of Districts

744 ASHAs will be selected from 33 Districts by Block PHC (In-Charge) on the basis of their participation in various programmes.

Out of 744, 200 nos. of ASHA will be from Kamrup (M) as Dengue is an urban disease & 90% cases are from Kamrup (M).

After selection, ASHAs will be trained by the DVBD Consultant and DMO about the source reduction programme in a very simple way –

- * Like what is Dengue
- * What are the symptoms of Dengue?
- * Where are the diagnosis and treatment done?
- * What is its breeding place?
- * How can we destroy the breeding place?

During source reduction programme they will search for source by visiting house to house and will destroy it. They will distribute leaflet and give awareness to the community – to avoid accumulation of water in the surrounding, cover the water container, to change the water before 7 days. They will do fever survey also.

Their activity will be supervised by DMO & DVBD Consultant, State officials of NVBDCP & IDSP, Assam

Each ASHA will be paid Rs.200/- per month for 5 months.

FMR Code-3.1.1.4.4

ASHA incentive for referral of AES/JE cases to the nearest CHC/DH/Medical College:-

FMR Owner-State-

- Dr. Pranab Das, (SNO, JE)
- DMO/DVBDC

Budget Approved: 0.57 Lakhs for 19 districts

Objectives of referral Cases:

1. Patient complains of fever with unconscious at the villages, ASHAs should examine the patient with RDT for malaria and she should immediately refer the cases to the nearest hospital. ASHA should also accompany with the patient for coordination at hospital
2. ASHA should inform 108 for transportation of patient to the hospital.
3. Management of AES/JE case at the nearest hospital recovers early and Cases Fatality Rate (CFR) also reduced.

Training of ASHA's

1. A training programme of ASHAs is to be carried out for AES/JE regarding sign/symptom of AES/JE.
2. Criteria for referral of patients to the nearest hospital

Monitoring of ASHAs performance:

1. A fever case with altered sensorial attends OPD/admission at hospital, the name of the accompanied ASHA to be noted at the patient history sheet.

Claim form for ASHAs

1. Name of the referred patient :
2. Age Sex
3. Name of the treating hospital :
4. Name of the ASHA:
5. Total no of patient refer for the month of:
6. Rs 300/- is the incentives/patient
7. Total Rs 3000 per district for 10 numbers of cases.
8. The claim form will be submitted to the BPHC for payment

Signature of ASHA:

Signature of MPW

Signature of ANM

Operational cost for Spray Wages :-

FMR Owner-State-

- SPO, NVBDCP
- District-DMO/DBVDC

Budget Approved: 24.42 Lakhs for 5 districts

Amount has been provided to Districts @Rs.111000/- per squad for each round for DDT Spray where spraying is done.

Total number of squad allotted to districts is 12 for the period 2020-21.

Each Squad consists of 6 members (where 1 is supervisor which is skilled, 5 are workers which are unskilled)

Supervisor Wages rate- @ Rs.280/- per for 5 Months (i.e. for 1st Round & 2nd Round)

Unskilled Wages Rate- @ Rs.240/- per day for 5 Months (i.e. for 1st Round & 2nd Round).

FMR Code-3.2.5.1.3

Operational cost for Impregnation of Bed nets for NE states :-

FMR Owner-State-

- SPO, NVBDCP
- District-DMO/DBVDC

Budget Approved: 17.10 Lakhs for 33 districts

Objectives:

- No of community owned bed net surveyed in the villages by ASHAs/MPWS.
- The beds net of the community are to be impregnated by insecticides, Deltamethrin at the villages.
- This activity is very popular among the communities.
- The activities is carried by ASHAs and health worker
- Identified VHSC villages get 1st priorities for ITBN

Financial guidelines:

- Approximately 500 nets are to be impregnated/day
- Rs 2/-per net is earmarked to ASHA who mobilize the community to come at a particular place on a fixed date including IEC/BCC.
- Rs 1/- per net for logistic support like Gamla, Gloves and plastic sheet.
- Supervision & Monitoring: MI, MTS , ASHA Supervisors
- Fever survey is also to be conducted

| Sl. No. | District | No. of Community Owned bed net planned for impregnation | Unit Cost | Cost of Impregnation Rs. 3/- per net including IEC/BCC (ASHA incentive- Rs. 2 per net, including IEC/BCC and for necessary logistics-Rs 1 per Net) |

Larvivorous Fish Support :-

FMR Owner-State-

- **SPO, NVBDCP**
- **District-DMO/DBVDC**

Budget Approved: 1.00 Lakhs

- As per letter Reference 755/- dated 12/07/2019 of NIMR, Guwahati, the fund is allotted to NIMR for supply of Guppy fish to the district as per requirement.
- DMO/District Consultant directed to inform the requirement of Guppy fish to NIMR Guwahati for identified 1000 VHSC.
- NIMR , Guwahati supply the Fish to the District/Block PHC.
- The DMO/ District Consultant will introduced the Guppy Fish in the water reservoir/drains at the village
- Entomological Study by NIMR: The team of NIMR will study the guppy fish on quarterly basis and impact of vector control.
- The DMO/District Consultant and State Entomological wing also monitoring the activities.
- A memorandum will understanding will be signed with the SPO, NVBDCP and NIMR, Guwahati.

FMR Code-3.2.5.2.1-

Dengue & Chikungunya: Vector Control, environmental management& fogging machine:-

FMR Owner-State-

- **SPO, NVBDCP**
- **District-DMO/DBVDC**

Budget Approved: 20.60 Lakhs for 33 Districts and State HQ

Fund will be flexible to use in case of –

1. Hiring of labour by giving daily wages of Rs.240/- for source reduction can be done where man power is not sufficient for this programme.
2. For ITBN camp- this is a popular method where bed net from the community is treated with insecticide (Deltamethrine, Keothrine). Rs.1/- per bed net given to ASHA who mobilize the community to come to the camp during ITBN camp awareness is given regarding vector borne disease and fever survey also done.
3. Fogging – Malathion fogging operation can be carried out where funds are not available/sufficient from other head.

FMR Code-3.2.5.2.2-

Acute Encephalitis Syndrome(AES)/ Japanese Encephalitis (JE): Operational costs for Malathion fogging

FMR Owner-State-

- **SPO, NVBDCP**
- **District-DMO/DBVDC**

Budget Approved: 65.00 Lakhs for 33 districts

JE vector are exophilicendophagic in nature. The risk of transmission increases when the human dwellings and animal sheds particularly piggeries are situated very close to each other. When they are situated far from each other the risk of transmission is reduced. • Because of outdoor resting habits and crepuscular nature, the vector control using indoor residual spray is technically not feasible. In addition to this, due to vast and enormous breeding habitats like perennial ponds, paddy fields and other water body's larval control using various anti larval measures is also not feasible as it is resource intensive. Therefore, vector control using ULV fogging (ultra low volume) is the only recommended method of vector control and can be used during JE epidemics also.

Pre requisites of thermal fogging

- Thermal fogging with portable fogging is done in outdoor situations (outside human habitation), where large number of JE cases are reported.
- Fogging should be carried out in downwind to upwind direction. During outdoor fogging it is important to direct the fog to all possible adult mosquito resting sites like bushes, tree-shaded areas and other outdoor resting in peril domestic habitats.
- the most effective type of thermal fog for mosquito control is medium / dry fog i.e. it should just moisten the hand when the hand is passed quickly through the fog at a distance of about 2.5 to 3.0 meters in front of the fog tube.

Time of fogging: Late evening between (17:00 19:00 hrs) early evening Mid-morning or afternoon.

Frequency of fogging: During outbreak situations, fogging applications have to be carried out at 7-10 days interval till a significant reduction in vector densities is achieved.

Points to remember during ULV fogging

- In the late evening hour, temperature is very cool when the vector mosquitoes are most active fogging is more effective.
- Cool weather in the evening hour is more comfortable for worker wearing protective clothing.
- in the afternoon when the temperature is high, convection currents from the ground will prevent concentration of the spray close to the resting places of adult mosquitoes flying or resting, thus rendering the spray ineffective.
- An optimum wind speed of between 3 and 13 hm/hr enables the spray to move slowly and steadily over the ground, allowing for maximum exposure of mosquitoes to the spray. Air movements of less than 3 km/hr may result in vertical mixing, while winds greater than 13 km/hr disperse the spray too quickly.
- In heavy rain, the spray generated loses its consistency and effectiveness. When the rain is heavy, spraying should stop and the spray head of the ULV machine should be turned down to prevent water from entering the blower.

ULV fogging in JE control is not recommended as a routine vector control method, it should only be used during epidemics or when large numbers of JE cases are reported from any JE endemic areas. Selection of insecticide and requirements of material and manpower The insecticide is selected on the

basic biological effectiveness against the vector concerned; it's likely effect on target and non-target organisms, and its hazard to humans, threat to the environment posted by its proposed use, cost, transportation requirements and availability of suitable application equipment. Under NVBDCP, Presently Malathion and Pyrethrum formulations are use for fogging applications,

For thermal fogging: 5 per cent Malathion (Technical) in kerosene/diesel (1 liter of technical Malathion in 19 liters of diluents). The application rate of insecticide with most of this equipment is generally. Most of the portable mist blowers/foggers can be operated by one person, yet it is desirable to make a team of two operators to facilitate transportation of insecticides, spares etc. and maintenance of records of operations.

MDA in LF endemic districts-Additional MF Survey:-

FMR Owner-

- **Dr.Kumarendra Nath(Asstt Director),**
- **District-DMO/DBVDC**
-

Budget Approved: 0.51 Lakhs

Additional Mf survey once in a year is a sentinel & random designed Blood Slide Collection night survey in Filaria endemic districts to examine the presence or absence of Mf transmission in the communities. In a district, 4 sentinel & 4 random sites are selected. A minimum of 50(fifty) BS should collect from each site, i.e. a minimum of 400 BS are to be collected. Generally, this survey is carried out by the District survey team with the survey team of Asstt.DHS (Filaria) office, Guwahati.

MDA in LF endemic districts -ICT Survey:-

FMR Owner-

- **Dr.Kumarendra Nath(Asstt Director),**
- **District-DMO/DBVDC**
- **Budget Approved: 1.30 Lakhs**

Transmission Assessment Survey (TAS) will be performed by the help of Immuno Chromatographic Test(ICT) card in 3(three) districts - Dibrugarh, Sivasagar & Dhubri in the month of October, 2018. Targeted communities are school children from 1st to 2nd standard. For 2nd TAS, districts have to perform the following activities-

- Mf survey in 8 sites before the date(s) of 2nd TAS.
- Collection of block wise total primary schools both Govt. & Private with students enrolment/absentee rate in the district
- Selection of schools by using WHO software for ICT survey.
- Orientation Training of ICT survey team with MOs.

One ICT survey team may be constituted with 5 Health Workers. A district may form 5 teams per day for 12 days.
